

What is Markdown?

Markdown is a markup language that lets you write plain text documents with a few lightweight formatting options. Markdown is content-focused – the user does not need to worry about tags like in HTML. Markdown is future-proof since it uses plain text instead of proprietary document formats.

What is Linux?

Linux is a Unix-like Operating System popular in academic and business environments. Linux consists of a kernel, libraries, and utilities that make up the entire operating system. Linux is available in many distributions (any operating system that runs the Linux kernel).

What is Ubuntu?

Ubuntu is a Linux distribution, freely available with both community and professional support. The Ubuntu community is built on ideas enshrined in the Ubuntu Manifesto.
